Product Application Instructions - Carlack Fast Detailer

Carlack Fast Detailer is a liquid spray on polish to final finish or enhance your polished surfaces. Carlack Fast Detailer compliments all Carlack polish products and can be used to give a deeper gloss after applying Carlack polishes.

Carlack Fast Detailer is also useful for removing light marks such as watermarks, fingerprints and bug markings.

Carlack Fast Detailer is a popular product for those who show their vehicles and want to spot clean.

Note: Being a final step product this product offers very little cleaning properties and is best used on an already prepared and polished surface.

Application.

Wipe or chamois the surface to remove dust. If required, spot polish heavier soiling using Carlack Complete 68 cleaner/sealer polish. Apply Carlack Fast Detailer directly to the surface in a sweeping action to spread the polish. Using a clean soft cotton or microfibre cloth, spread the Carlack Fast Detailer liquid until dry and streak free. Re-apply as required for a deep, easy shine.

This product can be used on all surfaces and while it complements the Carlack range of polish products can be used on all other polish products.

The Carlack Car Care range also offers paint care and glass care products and other cleaning products including Carlack Leather Cream and Carlack Carisma Interior Fragrance.
