Distributors of quality car care products

Product Application Instructions - Carlack Glass Clear

Carlack Glass Clear has been formulated for use on all glass surfaces and products. Carlack Glass Clear is an effective spray on glass cleaner and is useful for removing road contaminants such as oils and similar by-products, bugs and water spots to provide clear vision.

Carlack Glass Clear is suitable for vehicle interior and exterior glass and leaves a lasting shine on the glass. The Carlack Glass Clear formula leaves a product barrier on the glass that assists in the prevention of fogging on interior glass and leaves a mild water repelling effect on exterior glass.

Carlack Glass Clear can be used to clean glass for clear vision at any time or for cleaning and removing watermarks after a vehicle has been washed.

Carlack Glass Cleaner is safe on most window tints and is not recommended for window tint that is peeling or bubbling.

Application.

Spray Carlack Glass Clear directly to the glass surface. Allow to sit for 10 – 15 seconds and then Remove using a soft or microfibre cloth. Scrunched newspaper can also be used to remove Carlack Glass Clear. Reapply as required on stubborn spots or stains on the glass.

Carlack Glass Sealer can be applied to the cleaned glass to provide a barrier against new deposits and provide a water repellent surface.

For excessively stained or contaminated glass we recommend the use of Carlack Glass Compound to remove ingrained contaminants from the glass surface – especially forward facing glass.

The Carlack Car Care range also offers paint care and glass care products and interior cleaning products including Carlack Plastic Renew and Carlack Complete 68 polish.
