Product Application Instructions - Carlack Leather Cream

Carlack Leather Cream is designed to nourish and preserve the leather trim inside your vehicle.

Carlack Leather Cream can be used on both old and new leathers. This product can also be applied to artificial leather.

Step 1.

Clean the interior surfaces of your vehicle with a damp cloth. Allow to dry.

Step 2.

Apply Carlack Leather Cream to a clean cloth and then apply gently to the leather in gentle overlapping motions. Allow to absorb for 10 minutes and reapply if required, especially on older leather. Once absorbed, remove any residue with a soft clean cloth and buff to a light shine.

Carlack Leather Cream can be used on all types of leather.

The Carlack Car Care range also offers paint care and glass care products and other interior cleaning products including Carlack Plastic Renew and Carlack Carisma Interior Fragrance.
