## Product Application Instructions - Carlack Prime Cleaner

Carlack Prime Cleaner has been developed as a hard and soft surface cleaner suitable for plastics, vinyls, cloth and carpets. Carlack Prime Cleaner is designed to remove stubborn stains such as salt, oils, food stains and dirt.

Carlack Prime Cleaner can be applied directly to surfaces and then worked in with a cloth or brush depending on the material to be cleaned.

Carlack Prime Cleaner is also suitable for cleaning glass and chrome

### Step 1.

Clean the interior surfaces of your vehicle with a damp cloth to remove any loose dirt or dust. Apply Carlack Prime Cleaner directly to the surface and rub gently with a cloth or brush. For more stubborn stains allow to sit on the stain for several minutes prior to cleaning actions. Stubborn stains may require additional applications.

### Step 2.

After cleaning of the surface, wipe over with a damp cloth to remove any stain and products residue. For vinyl and plastic surfaces we recommend using Carlack Plastic Renew to revitalise and protect the surface. After cleaning soft surfaces we recommend sponging with water and then drying using a clean cloth in a dabbing motion. This will assist the drying time post cleaning. If used to clean glass clean off with newspaper. For an improved cleaning finish on glass we recommend Carlack Glass Cleaner.

**\*We recommend trialling Carlack Prime Cleaner on a small section of your cleaning area first to determine effects on the surface to be cleaned. While this product has been extensively tested it has not been tested on all surfaces and materials\***

The Carlack Car Care range also offers paint care and glass care products and other interior cleaning products including Carlack Leather Cream and Carlack Carissima Interior Fragrance.
