## Product Application Instructions - Carlack Shampoo

Carlack Shampoo is a general purpose surface wash suitable for cars, boats, caravans and bikes. Carlack Shampoo is designed to soften and clean dirt deposits on your vehicle and clean them away. Carlack Shampoo has a gentle foam and is bio-degradable.

Carlack Shampoo is designed to work with Carlack Polishes and contains polish properties\* that build onto the existing Carlack polish, leaving a glossy finish.

Carlack Shampoo is a concentrate with a mixture rate of 2 capfuls to 10 litres of water – 3 capfuls for more contaminated surfaces.

**Please follow your local water restrictions and environmental regulations when using this product. Carlack Products recommend washing your vehicle on a soft (grass) surface.**

### **Step 1.**

Add 2-3 capfuls of Carlack Shampoo to a clean bucket (10-20litres) and fill with water. When filling allow the hose to enter and exit the water level of the bucket to provide foam. Wet the vehicle and wash your vehicle in the normal way. For larger contaminants and deposits allow the shampoo and foam to soak the spots – firmer washing actions may be required on some dirt spots. Wash sections or sides of the vehicle at a time and rinse.

### **Step 2.**

After washing and rinsing all sections of the vehicle give a final rinse and then towel dry or chamois the vehicle to prevent water spots. Once the vehicle is dry it can be inspected for polishing requirements using Carlack Cutting Compound, Carlack Complete 68, Carlack Longlife or Carlack Fast Detailer as required.

The Carlack Car Care range also offers paint care and interior care products and other interior cleaning products including Carlack Leather Cream and Carlack Carisma Interior Fragrance.
