

Zeemax Mini Cs Fitting Instructions

Remove from vehicle: Front Grill, Front & Rear Bumpers, Wheel Arch Extensions (where fitted) and Sill Trim

Front Bumper Spoiler fits under grill and is bolted along lower grill edge and into number plate brackets

Front Wheel Arches are flanged at rear and either edge for a perfect fit, these are drilled and bolted in place. If you are lowering the car and fitting wider wheels then the wheel arches would have to be trimmed. Use flange on the Zeemax wheel arch as a template. This will give you the correct amount to trim off

Lower seam sill, below door, must be cut and flattened at beginning of rear wheel arch to enable sill to sit flat

Side Skirts are bonded to side lower sill seam and bolt to flange on both front and rear arch extensions

Rear Bumper is bonded with sealant to bumper flange bolts to each rear Wheel Arch flange

It is preferable to trial fit and drill all mounting holes remove and paint for protection and to ensure all edges are painted then refit to body work

If 13 inch wheels are being fitted and the suspension is being lowered, then the original metal wheel arches will have to be trimmed accordingly to allow front wheels to turn and clear, and rear wheels arches to clear tyres

Important Note: Due to the nature of manufacture, ie: the parts are hand laid, we have been advised by our manufacturer that the parts be baked before priming, in order to expose any air pockets that may be present, therefore these can be dealt with before priming and painting.

No claim may be made against Zeemax for product distortion due to adverse climate changes.

We have the kits made in a dark colour so that it will show up any slight imperfections in manufacture due to the nature of the composite material which cannot be avoided and go with the territory.

This does not mean that the product is in any way sub standard, but makes it easier for the body shop when pre baking the parts before priming and painting to find any imperfections that may be present.

Any queries, please phone us.
