

# PREMIUM DIGITAL INCLINOMETER

DS7000A

The Premium Inclinometer provides a full colour configurable pitch and roll display that is highly visible to operators of industrial machinery. Many aspects of the Inclinometer are customisable, including positioning and sensitivity of the sensors, separate alarms and warnings for stationary or moving vehicles and four distinct primary display options.

Warning and alarm events are logged to a microSD® card, to allow for later review and reporting.

### Included Accessories

Tilt Sensor

RAM Mount

Wiring Loom

GPS Antenna

### FEATURES INCLUDE:

- Large colour screen
- Simultaneous pitch and roll
- Graphical modes
- Warning and alarm outputs
- Stationary and moving alarm thresholds
- Logging of alarm and warning events to SD card
- Time, date, location and speed as well as incline
- Password protection

Made in Australia

# DUAL AXIS INCLINOMETER

DS1000B

The Dual-Axis Inclinometer provides a highly visible and configurable pitch and roll display to operators of industrial machinery.

Designed for harsh industrial environments, the module features a tough fascia with integrated buttons and LCD graphics display.

The unit allows customisation of sensor response times to allow maximum flexibility in various applications.

Alarms and warnings can be configured from the integrated menu and saved to memory.

## FEATURES INCLUDE:

- High visibility display
- Simultaneous pitch and roll
- Graphical mode
- Warning and alarm outputs
- Remote sensor
- Password protection
